

5th & 6th CULINARY SCIENCE CLUB

Learn the science behind all that we eat.

Students will explore food at its basic level. From menu selection to ingredient prep and food preparation techniques, the soon-to-be chef will discover the how-to's of the kitchen. Basic skills will allow students to create simplified dishes and cooking methods will lead to more advanced dishes that kitchen confidence will create. Culinary skill is an art form based in science.

The club will meet on *Mondays and Fridays* from *2:30-4:00ish*, gotta wait till it's done, beginning September 25th and will run through November 9th. Please be willing to try new foods but, if you have food allergies this may not be for you.

Club size will be limited to 10 because too many cooks....(well, you know the rest) and there is an ingredient and equipment fee of \$45 for groceries and materials. Applicants will be accepted on a first come basis and must follow all kitchen safety rules to remain a member of the club.

Please return the bottom portion to Mr. Finch in the Science lab, and fees will be collected at the first meeting on the 25th.
